

### 3.5 Monitoring of trends and issues

Procedures are in place across the provider for:

- monitoring the consistency of eligibility requirements applied across the provider including procedures for the recognition of accredited and non-accredited prior learning
- systematic monitoring of provider level trends in the progress of research students, including completion rates and times to progress through key stages of the research degree

- the recording and periodic analysis of all supervisor and examiner appointments, including the frequency of appointment
- monitoring the careers of research graduates, for so long as this is feasible

Feedback from enrolled students, graduates and non-completing students is sought and recorded.

This feedback is supplemented with feedback from industry collaborators, employers, funding agencies, project sponsors, internal and external examiners and other supporting/administering staff and core national and international partners and collaborators.

While respecting confidentiality and anonymity, procedures are in place to record information on substantive matters raised by research students and others, with the objective of identifying and addressing ongoing recurring issues arising from supervision, examination, facilities, research practices or processes.
