

6.1 Supervision

Procedures in place for the supervision of research degree students:

- clearly define the composition of a supervisory team, the required qualification(s), experience and training, in addition to the roles and responsibilities of each member
- ensure that students receive effective supervision of their research and have a principal supervisor who is normally a member of staff and takes full responsibility for the overall management of the student and an appropriate level of responsibility for supervision

The supervision of each research student is the collective responsibility of the supervisor(s), the department/school/other appropriate research unit and the provider. Criteria and protocols for arrangements relating to co-supervision, external mentoring supervision and advisory roles are formally established.
